

BRB Digital — Full-Fledged CRM

Sales · Marketing · HR · Delivery — one system, aligned to SOP-SLS-01 and SOP-MKT-01

Document Title	BRB Digital — Full-Fledged Sales, Marketing & HR CRM
Document ID	PRD-CRM-01
Department	Cross-Functional — Sales, Marketing, HR, Delivery
Version	2.0 — Full PRD (Sales + Marketing + HR)
Effective Date	22-Jul-2026
Review Cycle	As required during build
Document Owner	Mr Arvind Mehta and Mr Faizal Ansari
Approved By	Pending — Mr. Arvind Mehta

1. Purpose

This PRD defines the requirements for a single, full-fledged CRM for BRB Digital that manages the complete lifecycle of the business — Sales (lead to closed deal), Marketing (client brief to campaign reporting), HR (hiring to exit), and Delivery (project execution) — in one connected system. It is built on, and aligned to, the agency's existing Standard Operating Procedures: SOP-SLS-01 (End-to-End Sales Process) and SOP-MKT-01 (Client & Campaign Project Management), translating each documented step into a system requirement so the CRM enforces the SOP rather than sitting apart from it.

2. Scope

In scope: lead capture and pipeline management, IVR-based calling, sales qualification through closing and handover, marketing/campaign briefing through reporting and closure, client onboarding, delivery/project execution, retention and renewal, invoicing status, HR and team management, and cross-functional reporting.

Out of scope (Phase 1): full payroll processing (HR module tracks attendance/leave/performance but integrates with a payroll tool rather than replacing it), full accounting/bookkeeping, native mobile app (mobile-responsive web only in Phase 1).

3. Roles & Responsibilities

Consolidated from SOP-SLS-01, SOP-MKT-01, and the HR/Delivery functions added in this PRD.

Sales (per SOP-SLS-01)

Role	Responsibility
Sales Representative / BDE / Telecaller	Prospects leads, calls via CRM IVR, conducts discovery, prepares proposals, negotiates, closes deals
Sales Manager / Sales Head	Approves pricing/discounts beyond standard limits, reviews pipeline, coaches the team, reassigns leads
Pre-Sales / Solutions Support	Supports technical scoping, demos, and proposal customization for complex deals
Finance / Billing	Validates pricing, processes invoices, confirms payment terms

Marketing (per SOP-MKT-01)

Role	Responsibility
Account / Client Servicing	Gathers client requirements, manages client communication, obtains client sign-offs
Marketing Manager	Approves project plans and budgets, reviews creative output, ensures quality and timelines
Strategy / Planning Team	Develops campaign strategy, target audience definition, and channel plan
Creative / Content Team	Produces copy, design, video, and other creative assets per the brief
Digital / Media Team	Executes campaigns across paid, owned, and social channels; monitors performance
Analytics Team	Tracks KPIs and compiles performance reports post-launch

HR & Delivery

Role	Responsibility
HR Manager / Admin	Owns recruitment pipeline, onboarding, attendance/leave policy, performance review cycles, exits
Marketing TL	Own their team's task queue, capacity, and delivery quality
Customer Success / Delivery	Receives handover post-close, manages onboarding and ongoing account servicing
Admin / Founder	Full visibility across Sales, Marketing, HR, and Delivery; final approvals

4. Definitions & Abbreviations

Term	Definition
Lead	A person or organization that has shown potential interest in BRB Digital's services
MQL	Marketing Qualified Lead - assessed by Marketing as ready for sales engagement
SQL	Sales Qualified Lead - vetted by Sales as having genuine buying intent and fit
BANT	Budget, Authority, Need, Timeline — qualification framework used at Step 4 of the Sales SOP
CRM	This system — used to track leads, opportunities, campaigns, delivery, and HR records
Closed-Won / Closed-Lost	CRM status indicating a deal has been won or lost
Brief	Document capturing client/stakeholder requirements, objectives, audience, and constraints for a project
Creative Concept	The core idea and visual/messaging direction proposed for a campaign
KPI	Key Performance Indicator used to measure campaign success (reach, CTR, conversions, etc.)
Sign-off	Formal approval from a client or internal stakeholder to proceed to the next stage
Go-Live	The point at which a campaign or content is published/launched to its audience
IVR	Interactive Voice Response / cloud telephony system integrated for click-to-call and recording
Scope of Work (SoW)	The structured list of deliverables and terms attached to a Won deal at handover

5. System Overview — End-to-End Flow

The CRM connects four functional chains into one continuous record per client:

- Meta/Google campaign → Lead auto-captured → Auto-assigned to BDE → IVR call (recorded) → Status + comment logged → Qualification (BANT) → Discovery → Proposal & Negotiation → Closing → Order Processing & Handover
- Handover → Client/Project Brief received by Account Servicing → Campaign/Project Planning → Creative & Content Development → Client Approvals → Execution & Launch → Monitoring & Optimization → Reporting & Project Closure
- In parallel — HR: Recruitment → Onboarding → Attendance/Leave → Task & Performance Management → Exit, feeding the same department capacity the Delivery module draws on
- Continuous — Post-Sale Account Management: relationship check-ins, renewal tracking, and pipeline/forecast reporting

6. Module 1 — Lead Capture (Meta + Google)

ID	Requirement
FR-1.1	Ingest leads in real time from Meta Lead Ads via webhook/API
FR-1.2	Ingest leads in real time from Google Ads (Lead Form Extensions) via API
FR-1.3	Capture leads from inbound (website, referrals) and outbound (cold calling, LinkedIn, events) channels per SOP-SLS-01 Step 1, logged into the CRM
FR-1.4	De-duplicate leads by phone/email across all sources before queueing
FR-1.5	Sales Manager/system auto-assigns each new lead to a Representative by territory, product line, or account size (SOP-SLS-01 Step 2)
FR-1.6	Instantly notify the assigned Representative (in-app + WhatsApp/email)
FR-1.7	Tag lead source as MQL where it originates from a Marketing campaign, distinguishing it from directly sourced SQLs

7. Module 2 — Sales Pipeline, IVR Calling & Status Workflow

This module operationalizes SOP-SLS-01 Sections 5.2–5.6 (Lead Qualification through Order Processing & Handover) as CRM workflow.

7.1 Calling — IVR Integration & Click-to-Call

ID	Requirement
FR-2.1	Integrate a third-party IVR/cloud telephony provider (make your own or buy from any company)
FR-2.2	Click-to-call directly from the lead record — no external dialer
FR-2.3	Automatically record every call and attach the recording to the lead's timeline
FR-2.4	Auto-capture call duration, time, and outcome against the lead
FR-2.5	Representative contacts the lead within the defined SLA (default 24 hours per SOP-SLS-01 Step 3); system escalates to Sales Manager if breached

7.2 Status & Comment Workflow (7 statuses)

The 7 CRM statuses map to the SOP-SLS-01 opportunity stages as follows:

CRM Status	Corresponding SOP-SLS-01 Stage
New	Lead captured (Step 1), not yet contacted
Connected	Initial Outreach completed (Step 3)
Follow-up	Lead qualified as SQL but needs further nurturing before Discovery (Steps 4–5)
Meeting Scheduled	Discovery Call / Demo booked (Steps 6–8)
Meeting Done	Discovery / Demo completed; Proposal in preparation (Steps 8–9)
Junk	Disqualified lead — reason logged, handed to Marketing for nurture (Step 5)
Won	Closed-Won — contract/PO executed (Steps 13–15)

ID	Requirement
FR-2.6	Restrict lead status to exactly these 7 values, editable only by Admin at configuration level
FR-2.7	Require a comment on every status change — mandatory, not skippable
FR-2.8	Timestamp and attribute every status change + comment to the Representative who made it
FR-2.9	Display full status/comment history per lead on one chronological timeline
FR-2.10	Apply BANT qualification fields (Budget, Authority, Need, Timeline) at the Qualification stage before a lead can move to Connected → Followup

7.3 Discovery, Proposal & Negotiation

ID	Requirement
FR-2.11	Log structured Discovery Call notes against the opportunity (business challenges, requirements, budget, timeline) — SOP Step 6
FR-2.12	Provide reusable proposal/quotation templates per service line — SOP Step 9
FR-2.13	Route any pricing/discount beyond standard authority limits to the Sales Manager for approval before sending — SOP Step 10
FR-2.14	Log the proposal in the CRM with date and version when sent — SOP Step 11
FR-2.15	Track objection-handling and revision history through negotiation while enforcing approved pricing bands — SOP Step 12

7.4 Closing, Order Processing & Handover

ID	Requirement
FR-2.16	Support a 'Verbal Commit' stage update ahead of final signature — SOP Step 13
FR-2.17	Integrate e-signature for contract/PO execution — SOP Step 14
FR-2.18	On signature, mark Closed-Won with final deal value and key terms recorded — SOP Step 15
FR-2.19	Submit order details to Finance/Operations for invoicing and fulfillment setup — SOP Step 16
FR-2.20	Structured handover form to Customer Success/Delivery capturing account context, commitments made, and key contacts — SOP Step 17
FR-2.21	Auto-schedule the onboarding kickoff call within the agreed timeframe upon handover — SOP Step 18

8. Module 3 — Marketing / Campaign & Project Management

This module operationalizes SOP-MKT-01 end to end, covering every client/internal marketing project from brief to closure.

8.1 Briefing & Requirement Gathering

ID	Requirement
FR-3.1	Structured brief-intake form capturing objectives, target audience, deliverables, timeline, and budget — SOP Step 1
FR-3.2	Schedule a kick-off/clarification call with the client or stakeholder, logged against the project — SOP Step 2
FR-3.3	Route the finalized brief to the Marketing Manager for internal sign-off before planning begins — SOP Step 3

8.2 Campaign / Project Planning

ID	Requirement
FR-3.4	Strategy workspace to define campaign approach, audience segments, key messages, and channel mix — SOP Step 4
FR-3.5	Project plan builder with timeline, milestones, resource allocation, and budget breakdown — SOP Step 5
FR-3.6	Budget approval workflow routed to Marketing Manager (and Finance where required) before execution — SOP Step 6

8.3 Creative & Content Development

ID	Requirement
FR-3.7	Concept board for the Creative team to log initial concepts, messaging, and visual direction — SOP Step 7
FR-3.8	Internal review workflow — Marketing Manager approves brand alignment and quality before external sharing — SOP Step 8
FR-3.9	Asset production workspace with file/version control for copy, design, video, and digital content — SOP Step 9

8.4 Approvals

ID	Requirement
FR-3.10	Client/stakeholder review workflow — Account Servicing shares creative work and captures feedback — SOP Step 10
FR-3.11	Revision rounds tracked against the agreed limit, with each round's feedback logged — SOP Step 11
FR-3.12	Final client/stakeholder sign-off captured (e-signature or logged written approval) before launch — SOP Step 12

8.5 Execution & Launch

ID	Requirement
FR-3.13	Pre-launch checklist confirming tracking setup, scheduling, and channel readiness — SOP Step 13
FR-3.14	Go-live scheduling across agreed channels on the confirmed date — SOP Step 14
FR-3.15	Auto-notify Account Servicing to confirm successful launch to the client/stakeholder — SOP Step 15

8.6 Monitoring & Optimization

ID	Requirement
FR-3.16	KPI dashboard tracking campaign performance in real time throughout the active period — SOP Step 16
FR-3.17	Mid-flight optimization log capturing targeting, budget, or creative adjustments and the reasoning — SOP Step 17

8.7 Reporting & Project Closure

ID	Requirement
FR-3.18	Auto-compile a performance report against defined KPIs at campaign end — SOP Step 18
FR-3.19	Package findings and recommendations for presentation to the client/stakeholder — SOP Step 19
FR-3.20	Formal project closure workflow — archives assets/reports and logs learnings for future reference — SOP Step 20

9. Module 4 — HR & Team Management

Not covered by an existing SOP — included because a full-fledged CRM for an 8-person, multi-department agency needs the team layer connected to the same system that assigns and tracks their work.

9.1 Recruitment & Hiring

ID	Requirement
FR-4.1	Job requisition form (role, department, headcount, budget) raised by a Department Head, approved by Admin
FR-4.2	Candidate pipeline with stages: Applied → Screening → Interview → Offer → Hired / Rejected
FR-4.3	Interview scheduling with calendar sync and interviewer feedback logged per candidate
FR-4.4	Offer management — offer letter generation and status tracking (sent, accepted, declined)

9.2 Onboarding & Offboarding

ID	Requirement
FR-4.5	New-hire onboarding checklist — documentation, asset/access provisioning, induction schedule
FR-4.6	New employee auto-linked to their department's task board and reporting manager on Day 1
FR-4.7	Exit workflow — resignation/termination logging, notice period tracking, exit interview, asset recovery, access revocation

9.3 Attendance & Leave

ID	Requirement
FR-4.8	Daily attendance capture (in/out or WFH marking)
FR-4.9	Leave application and approval workflow routed to the reporting manager
FR-4.10	Leave balance tracking per employee, visible to both employee and manager

9.4 Task, Workload & Performance Management

ID	Requirement
FR-4.11	Team capacity view per department, drawing on the same task data as the Delivery module (Module 6)
FR-4.12	Goal/KPI setting per employee with periodic review cycles (e.g., quarterly)
FR-4.13	Performance review workflow — self-assessment, manager review, and final rating logged per cycle

10. Module 5 — Client Onboarding & Handover

ID	Requirement
FR-5.1	Auto-create a client profile merging the full lead-to-Won history the moment a deal is marked Won
FR-5.2	Structured Scope-of-Work form completed by the Representative at handover: services sold, deliverables, timelines, special instructions
FR-5.3	Every deliverable listed as an individual, trackable line item — not a single paragraph
FR-5.4	Onboarding checklist auto-generated based on services sold
FR-5.5	Relevant department(s) notified automatically with full lead/call history and Scope of Work attached

11. Module 6 — Delivery & Work Management

ID	Requirement
FR-6.1	Delivery project auto-created per client, linked to the contracted Scope of Work
FR-6.2	Department-wise task boards: SEO, Design, Social, Video, Content, Web, Performance
FR-6.3	Task assignment with deadlines, priority, and dependencies
FR-6.4	File/asset upload with version control per task
FR-6.5	Recurring task automation for retainer clients (e.g., monthly content calendar)
FR-6.6	Each deliverable shows: what it is, quantity/frequency, deadline, and current status
FR-6.7	Department task boards draw on the same capacity/workload view used by HR (Module 4.4)

12. Module 7 — Retention & Renewal (Post-Sale Account Management)

Operationalizes SOP-SLS-01 Section 5.7.

ID	Requirement
FR-7.1	Schedule periodic relationship check-ins per account, logged against the client record — SOP Step 19
FR-7.2	Track contract/subscription renewal dates and trigger outreach ahead of expiry (60/30/15 days) — SOP Step 20
FR-7.3	Client health score from payment delays, task-approval turnaround, and satisfaction survey results
FR-7.4	Churn-risk flag with escalation to the account owner
FR-7.5	Upsell/cross-sell tracker tied to a service catalogue
FR-7.6	Sales Manager reviews pipeline health and forecast accuracy in a weekly review view — SOP Step 21

13. Module 8 — Invoicing & Payments

ID	Requirement
FR-8.1	Generate invoices linked to contract value/milestones once Finance validates pricing (SOP Step 16)
FR-8.2	Track payment status: pending, partial, paid, overdue
FR-8.3	Automated payment reminders on overdue invoices
FR-8.4	Sync with the existing accounting tool (Zoho Books / Tally) rather than duplicate it

14. Module 9 — Reporting & Analytics Dashboards

ID	Requirement
FR-9.1	Sales: lead-to-win conversion by source/city/industry; BDE-wise call and revenue performance; pipeline & forecast view (SOP Step 21)
FR-9.2	Marketing: KPI performance per campaign, mid-flight optimization log, report archive (SOP Steps 16–18)
FR-9.3	Delivery: on-time delivery rate and task turnaround per department
FR-9.4	HR: headcount, attrition, open requisitions, leave utilization
FR-9.5	Retention: renewal rate, churn rate, average client lifetime value
FR-9.6	One executive dashboard combining Sales pipeline value, Marketing campaign health, Delivery status, HR headcount, and Retention health

15. Automation Engine

ID	Requirement
FR-10.1	Configurable trigger-action rules (e.g., new lead → auto-assign → WhatsApp welcome)
FR-10.2	Status-based email/reminder automation (Followup → email; Meeting Scheduled → calendar reminders)
FR-10.3	Event-based automation (Won → create Delivery project; invoice overdue → reminder; brief signed off → notify Strategy team)
FR-10.4	SLA-based escalation rules (uncontacted lead, overdue task, pending approval)

16. Non-Functional Requirements

Category	Requirement
Call Quality	Reliable IVR recording storage, retrievable for a minimum of 12 months
Data Integrity	Status/comment history is immutable — edits create new entries, never overwrites
Speed	Lead-to-assignment under 1 minute; call-log save under 2 seconds; dashboards load under 3 seconds
Security	Role-based access control across Sales, Marketing, HR and Delivery; encrypted storage; audit trail on all changes
Configurability	Statuses, automation rules, and templates editable by Admin without code changes
Scalability	Must support the phased multi-city outbound rollout already underway

17. Integrations Required

Category	Tool
Lead Sources	Meta Lead Ads API, Google Ads Lead Form API
Telephony / IVR	Exotel / Knowlarity / Ozonetel / MyOperator (vendor selection pending)
Email Automation	SMTP/Gmail or transactional email service (SendGrid)
Calendar	Google Calendar for meetings and campaign scheduling
E-signature	Zoho Sign / DocuSign for contracts and client sign-offs
Accounting	Zoho Books / Tally (sync, not replace)
Storage	Cloud storage for call recordings and creative assets
Payroll (optional)	Sync point for HR attendance/leave data — payroll processing stays external

18. Records & Documentation Maintained

Mirrors and extends the records already listed in SOP-SLS-01 §6 and SOP-MKT-01 §6:

- CRM lead and opportunity records; discovery call notes; proposals and quotations issued
- Approved pricing/discount exceptions; signed contracts / purchase orders; handover notes to Delivery
- Sales pipeline and forecast reports
- Client/project briefs and internal sign-offs; campaign strategy and project plans
- Approved budget documentation; creative concepts and revision history
- Client approval/sign-off records; campaign performance reports; project closure and learnings log
- HR records: recruitment pipeline, onboarding checklists, attendance/leave logs, performance review history, exit records

19. Assumptions & Dependencies

- Meta and Google Ads accounts have API access enabled for lead form data
- BRB Digital will select and provision an IVR/telephony vendor account — the CRM integrates via API rather than building telephony infrastructure
- Existing accounting tool (Zoho Books/Tally) has an available integration path

- Team structure (8-person, multi-department) remains broadly as currently defined for auto-assignment and capacity rules
- Payroll processing continues on the existing external tool; HR module feeds attendance/leave data to it

20. Risks & Mitigation

Risk	Mitigation
IVR vendor call quality/downtime	Choose a vendor with an SLA guarantee; keep a manual call-logging fallback
Team resistance to logging (Sales, Marketing, HR alike)	Keep data entry minimal; enforce via mandatory fields tied to workflow progression, not standalone forms
Scope creep across four functional modules in one build	Strict phased release (Section 21); MVP first, one module chain at a time
Incomplete Scope of Work at handoff causing delivery confusion	SoW fields mandatory before a deal can be finalized as Won
Google/Meta API changes	Monitor API versioning; maintain a manual CSV import fallback

21. Release Plan

Phase	Scope
Phase 1	Lead capture (Meta/Google) + 7-status Sales pipeline + IVR calling + mandatory comment logging
Phase 2	Proposal/negotiation/closing workflow + status-triggered automation + auto handoff to Delivery
Phase 3	Marketing/Campaign module end to end (brief → planning → creative → approvals → launch → reporting)
Phase 4	HR & Team Management module (recruitment → onboarding → attendance → performance → exit)
Phase 5	Full cross-functional reporting suite, retention/renewal automation, client portal

22. Success Metrics

- % reduction in lead response time (target: 90%+ of leads contacted within SLA)
- Increase in lead-to-win conversion rate
- % of marketing projects launched on the originally agreed date
- % of delivery projects completed on time, per department
- Renewal rate improvement / churn rate reduction
- Reduction in Sales-to-Delivery handoff time (target: same-day handoff)
- Reduction in time-to-hire for open roles (HR module)

23. Open Questions for Sign-off

- Which IVR/telephony vendor is preferred or already shortlisted?
- Should the HR module handle payroll calculation, or remain limited to attendance/leave/performance with an external payroll sync?
- Should the Marketing module's revision-round limit be fixed agency-wide, or configurable per client contract?
- Is a client-facing portal required in Phase 1 for campaign approvals, or is email/CRM-notification sign-off sufficient initially?
- Confirm the final department list for task boards if the team structure changes.

24. Revision History

Version	Date	Description	Author
1.0	22-Jul-2026	Initial CRM blueprint	Faizal / Claude
2.0	22-Jul-2026	Added detailed Sales workflow: IVR, 7-status pipeline, auto handoff	Faizal / Claude
3.0	22-Jul-2026	Full PRD — aligned to SOP-SLS-01 & SOP-MKT-01; added Marketing/Campaign module and HR/Team Management module	Faizal / Claude

This PRD is intended for developer/agency scoping, estimation, and sprint planning, and supersedes v2 by incorporating SOP-SLS-01 and SOP-MKT-01 in full, plus a new HR & Team Management module.
